## WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE  
PRINCIPAL TOWNS

*Compiled by the Central Statistics Office*

To be purchased through any Bookseller or directly from  
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 1. Vol. XCVI WEEK ENDED SATURDAY, 3rd JANUARY, 1959 PRICE 2d. NET

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 415—216 boys and 199 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 256. Of these, 4 deaths were due to tuberculosis, and 42 to malignant neoplasms. There was one accidental death which was due to carbon-monoxide poisoning. There was one suicide.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to gastro-enteritis, 2 to congenital malformation, one to atelectasis, one to marasmus, one to cerebral anoxia, and one to malignant disease.

The total number of births registered during the week in the principal towns, was 706—369 boys and 337 girls, of which 194 boys and 182 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 374, of which 196 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd January, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 408—213 boys and 195 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 245. Of these, 3 deaths were due to tuberculosis, one to diphtheria, and 23 to malignant neoplasms. There were 4 accidental deaths, one of which was due to a transport accident and one to drowning.

Among the deaths of infants under one year, 4 were due to pneumonia, 4 to prematurity, 3 to congenital malformation, one to asphyxia, one to maternal toxæmia, one to staphylococcal enteritis, one to atelectasis, one to injury at birth and one to cystic fibrosis of pancreas.

---

The total number of births registered during the week in the principal towns, was 688—361 boys and 327 girls, of which 212 boys and 181 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 347, of which 194 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 31st January, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

---

No. 9. Vol. XCVI      WEEK ENDED SATURDAY, 28th FEBRUARY, 1959      PRICE 2d. NET

---

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 373—209 boys and 164 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 213. Of these, 3 deaths were due to tuberculosis, and 26 to malignant neoplasms. There was one accidental death, and one suicide.

Among the deaths of infants under one year, 7 were due to prematurity, 3 to congenital malformation, 2 to injury at birth, 2 to broncho-pneumonia, one to neo-natal infection, and one to measles.

---

The total number of births registered during the week in the principal towns, was 658—357 boys and 301 girls, of which 169 boys and 156 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 312, of which 175 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 28th February, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 405—225 boys and 180 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 213. Of these, 3 deaths were due to tuberculosis, and 30 to malignant neoplasms. There were 5 accidental deaths, one of which was due to a transport accident and one to carbon monoxide poisoning. There were 2 suicides.

Among the deaths of infants under one year, 6 were due to pneumonia, 2 to congenital malformation, 2 to injury at birth, 2 to atelectasis, one to prematurity, one to hyaline membrane disease, one to influenzal pneumonia and one to whooping cough.

---

The total number of births registered during the week in the principal towns, was 694—379 boys and 315 girls, of which 225 boys and 168 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 291, of which 146 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 28th March, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

## WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

### PRINCIPAL TOWNS

*Compiled by the Central Statistics Office*

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

---

No. 9. Vol. XCVI      WEEK ENDED SATURDAY, 28th FEBRUARY, 1959      PRICE 2d. NET

---

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 373—209 boys and 164 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 213. Of these, 3 deaths were due to tuberculosis, and 26 to malignant neoplasms. There was one accidental death, and one suicide.

Among the deaths of infants under one year, 7 were due to prematurity, 3 to congenital malformation, 2 to injury at birth, 2 to broncho-pneumonia, one to neo-natal infection, and one to measles.

---

The total number of births registered during the week in the principal towns, was 658—357 boys and 301 girls, of which 169 boys and 156 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 312, of which 175 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 28th February, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

No. 12. Vol. XCVI      WEEK ENDED SATURDAY, 21st MARCH, 1959      PRICE 2d. NET

---

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 322—167 boys and 155 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 228. Of these, 4 deaths were due to tuberculosis, and 24 to malignant neoplasms. There were 7 accidental deaths, 2 of which were due to transport accidents and 2 to drowning (homicide).

Among the deaths of infants under one year, 2 were due to congenital malformation, one to injury at birth, one to prematurity, 5 to broncho-pneumonia, one to kernicterus, 2 to atelectasis and one to drowning (homicide).

---

The total number of births registered during the week in the principal towns, was 576—297 boys and 279 girls, of which 169 boys and 154 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 315, of which 175 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 21st March, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 307—153 boys and 154 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 251. Of these, 6 deaths were due to tuberculosis, and 31 to malignant neoplasms. There were 6 accidental deaths, two of which were due to drowning, one to a transport accident, one to burns and one to carbon monoxide poisoning.

Among the deaths of infants under one year, 5 were due to congenital malformation, 2 to pneumonia, 2 to anoxia, 2 to prematurity, one to injury at birth, one to atelectasis, one to meningococcal septicaemia, one to influenza, one to measles, one to mediastinal tumour, one to influenzal pneumonia and one to whooping cough.

The total number of births registered during the week in the principal towns, was 562—268 boys and 294 girls, of which 159 boys and 158 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 372, of which 200 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 4th April, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

## WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

### PRINCIPAL TOWNS

*Compiled by the Central Statistics Office*

To be purchased through any Bookseller or directly from  
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

---

No. 15. Vol. XCVI      WEEK ENDED SATURDAY, 11th APRIL, 1959      PRICE 2d. NET

---

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 376—207 boys and 169 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 246. Of these, 8 deaths were due to tuberculosis, and 40 to malignant neoplasms. There were 4 accidental deaths, two of which were due to drowning and one to a transport accident.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to atelectasis, 2 to prematurity, one to injury at birth, one to congenital malformation, one to septicaemia, one to haemolytic disease, one to infected appendix and one to pyelonephritis.

---

The total number of births registered during the week in the principal towns, was 641—345 boys and 296 girls, of which 172 boys and 173 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 374, of which 181 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 11th April, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

## WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

### PRINCIPAL TOWNS

*Compiled by the Central Statistics Office*

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 18. Vol. XCVI

WEEK ENDED SATURDAY, 2nd MAY, 1959

PRICE 2d. NET

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 406—223 boys and 183 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 166. Of these, one death was due to tuberculosis, and 17 to malignant neoplasms. There were 6 accidental deaths, one of which was due to a transport accident, and one to drowning. There was one suicide.

Among the deaths of infants under one year, 4 were due to atelectasis, 2 to prematurity, 2 to injury at birth, one to gastro-enteritis, one to congenital malformation and one to laryngotracheo-bronchitis.

The total number of births registered during the week in the principal towns, was 689—352 boys and 337 girls, of which 179 boys and 192 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 255, of which 123 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 2nd May, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

A blank ledger page with a grid of columns and rows, showing signs of aging and wear. The page is divided into several vertical columns of varying widths and horizontal rows. The paper is yellowed and has some dark spots and stains, particularly along the left edge. The grid lines are faint and dark, and the overall appearance is that of an old, unused account book or ledger.

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 22. Vol. XCVI WEEK ENDED SATURDAY, 30th MAY, 1959

PRICE 2d. NET

### **PRINCIPAL TOWNS**

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 458—221 boys and 237 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 162. Of these, one death was due to tuberculosis and 33 to malignant neoplasms. There were 6 accidental deaths, 2 of which were due to burns, one to drowning and one to a transport accident. There was one suicide.

Among the deaths of infants under one year, 4 were due to congenital malformation, 3 to prematurity, 2 to injury at birth, one to gastro-enteritis and one to atelectasis.

The total number of births registered during the week in the principal towns, was 771—370 boys and 401 girls, of which 214 boys and 204 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 284, of which 138 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 30th May, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 391—184 boys and 207 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 145. Of these, 6 deaths were due to tuberculosis and 23 to malignant neoplasms. There were 4 accidental deaths, one of which was due to a transport accident and one to drowning.

Among the deaths of infants under one year, 4 were due to congenital malformation, 7 to prematurity, one to pneumonia, 3 to atelectasis, one to gastro-enteritis, and one to hæmolytic disease.

---

The total number of births registered during the week in the principal towns, was 662—321 boys and 341 girls, of which 179 boys and 188 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 246, of which 129 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 20th June, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

## WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

### PRINCIPAL TOWNS

---

*Compiled by the Central Statistics Office*

---

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

---

No. 32. Vol. XCVI WEEK ENDED SATURDAY, 8th AUGUST, 1959

---

PRICE 2d. NET

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 357—182 boys and 175 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 118. Of these, 2 deaths were due to tuberculosis and 23 to malignant neoplasms. There was one accidental death, which was due to a transport accident.

Among the deaths of infants under one year, one was due to atelectasis, 2 to pneumonia and one to haemorrhage.

---

The total number of births registered during the week in the principal towns, was 626—320 boys and 306 girls, of which 174 boys and 185 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 184, of which 93 were registered in Dublin County Borough.

## WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

### PRINCIPAL TOWNS

*Compiled by the Central Statistics Office*

To be purchased through any Bookseller or directly from  
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

---

No. 38. Vol. XCVI WEEK ENDED SATURDAY, 19th SEPTEMBER, 1959 PRICE 2d. NET

---

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 395—193 boys and 202 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 124. Of these, 6 deaths were due to tuberculosis, one to diphtheria and 24 to malignant neoplasms. There were 6 accidental deaths, 3 of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to congenital malformation, 2 to prematurity, one to bronco-pneumonia, one to injury at birth and one to rhesus incompatibility.

---

The total number of births registered during the week in the principal towns, was 672—348 boys and 324 girls, of which 191 boys and 186 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 215, of which 107 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 19th September, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 358—195 boys and 163 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 143. Of these, one death was due to tuberculosis, and 24 to malignant neoplasms. There was one accidental death, which was due to a transport accident.

Among the deaths of infants under one year, 2 were due to congenital malformation, one to pneumonia, one to pulmonary syndrome, one to convulsions, one to marasmus, and one to injury at birth.

---

The total number of births registered during the week in the principal towns, was 602—312 boys and 290 girls, of which 167 boys and 124 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 237, of which 125 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 17th October, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 358—186 boys and 172 girls.

The number of deaths registered, of persons normally residing in the principal towns was 119. Of these, one death was due to tuberculosis and 26 to malignant neoplasms. There were 4 accidental deaths, one of which was due to a transport accident, and one to poisoning. There were two suicides.

Among the deaths of infants under one year, 4 were due to congenital malformation, 4 to atelectasis, 2 to prematurity, 2 to asphyxia, one to pneumonia, one to gastro-enteritis, one to marasmus, one to Ritter's disease, and one to erythroblastosis foetalis.

The total number of births registered during the week in the principal towns, was 625—315 boys and 310 girls, of which 160 boys and 173 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 192, of which 117 were registered in Dublin County Borough.

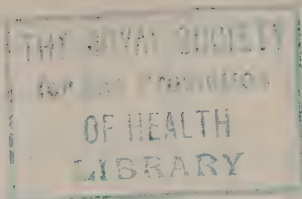

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 31st October, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

---

The number of births registered during the week, to persons normally residing in the principal towns, was 340—177 boys and 163 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 154. Of these, 3 deaths were due to tuberculosis and 33 to malignant neoplasms. There were 4 accidental deaths, one of which was due to a transport accident. There was one suicide.

Among the deaths of infants under one year, 4 were due to atelectasis, 3 to congenital malformation, 3 to injury at birth, 2 to prematurity, one to asphyxia, one to gastro-enteritis, one to meningitis and one to hydrops foe alis.

---

The total number of births registered during the week in the principal towns, was 550—283 boys and 267 girls, of which 134 boys and 137 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 241, of which 116 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 7th November, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

THE GOVERNMENT PUBLICATIONS SALE OFFICE G.P.O. ARCADE, DUBLIN

No. 49. Vol. XCVI WEEK ENDED SATURDAY, 5th DECEMBER 1959

PRICE 2d. Net

### PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 356—188 boys and 168 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 167. Of these, 3 deaths were due to tuberculosis and 27 to malignant neoplasms. There were 5 accidental deaths, 3 of which were due to transport accidents and one to burns.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to prematurity, 2 to congenital malformation, one to atelectasis, and one to acute respiratory infection.

The total number of births registered during the week in the principal towns, was 651—336 boys and 315 girls, of which 188 boys and 153 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 274, of which 127 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 5th December, 1959, which were assigned to the Principal Towns with similar particulars for BELFAST and DERRY.
